

Wing eBike Assembly instructions

1/ Take the front wheel out of box

2/ Lift the eBike out of the box

3/ Remove packaging

4/ Fit the handle bars using the tools provided

5/ Fit the saddle

*6/ Turn the eBike upside down on it's handle bars & saddle
Be careful not to damage the controller*

7/ Fit the pedals. The left pedal is on the none crank side

8/ Take the fork protector off and remove the brake pad spacer

9/ Fit the front wheel

Make sure the disk fits between the pads.

If they have closed up gently push them apart with a screwdriver

*10/ Fit front mud guard & Front & rear lights
(if supplied)*

11/ Switch the battery blue LED light on. Next hold down the middle burton on the handle bar controller and your ready to go.

12/ After a few miles all nuts and bolts need checking and tightening if need be.

Please keep regular checks on maintenance for safety reasons.

Enjoy!

Michael
